Abstract. The abstract should briefly summarize the contents of the paper in 150–200 words. The goal is to communicate: Background/motivation/context, Aim/objective(s)/problem statement, Approach/method(s)/procedure(s), Results, Conclusion(s)/implications.

Keywords: OT Security · Security Incident · Triton.

1 Introduction

2 Related Work

3 Comparative Overview of OT incidents

3.1 Methodology

3.2 Results

3.3 Quantitative Discussion

3.4 Qualitative Discussion

4 Detailed Analysis of the Triton Attack

4.1 Stage 1

4.2 Stage 2

4.3 Stage 3

5 Conclusion

The conclusion summarizes the research and discusses its significance. You should also point out future research directions. The goal is to: Provide a very brief summary of the results, Provide a future perspective on the work, Avoid: repeating the abstract; repeating background information from the introduction; introducing new arguments; repeating the arguments made in the main body; failing to address all of the research questions set out in the introduction.
